MARCH, 2009

Building Stronger Relationships for a Lifetime of Success

What is HIPAA?

“HIPAA” is an acronym for Health Insurance Portability & Accountability Act of 1996.

This act was established to improve efficiency in healthcare delivery, protection of confidentiality and secure of health data through setting and enforcing standards. This act established regulations for the use and disclosure of Protected Health Information (PHI).

This act ensures that the person receiving services are contacted for authorization before disclosing personal information. As a result of “HIPAA” it allows people to decide when to share personal information.

Any person who believes that the Privacy Rule is not been upheld please file a complaint with Ramseur Homes QA/QI and if the issues is not resolved, please contact the Department of Health and Human Services Offices for Client Rights.

People Participate in the life of the Community.

Ramseur Homes helps consumers engage in communities through use of group facilitation, community organizing and collaborative problem solving. We encourage people to engage in pro-active public outreach which provides opportunities for them to help implement solutions to complex issues. We connect consumers to public agencies in the community to improve their overall well-being and to reduce mental health symptoms.

Did You Know?

The Human Brain is Too Efficient.

According to a research at Cambridge University, it doesn't matter in what order the letters in a word are written, the only important thing is that the first and last letter be in the right place. The rest can be a total mess and you can still read it without a problem. This is because the human mind does not read every letter by itself, but the word as a whole.

If you can read this, please contact the office to be added to a gas gift card list.

March is National Nutrition Month

National Nutrition Month consists of nutrition education and informational campaigns which were created annually in March by the American Dietetic Association.

The campaign focuses on the importance of making informed food choices and developing healthy eating and physical activity habits.

A healthy eating plan includes; fruits, vegetables, whole grains and fat free or low-fat milk products. It also includes lean meats, poultry, fish, beans, eggs and nuts.
